SUBJECT INDEX

a

Administration of computing services; 2: 59.
Adoption of CAI, obstacles to; 1: 31.
Adult skills courseware; 4: 131.
Algebraic expression analysis; 3: 80.
Analyzing algebraic responses; 3: 80.
Aptitude-treatment interaction; 4: 122.
Arithmetic instruction; 4: 122.
Artificial intelligence; 4: 123.
Attitudes; 1: 15.
Automation models; 4: 122.

b

Basic knowledge; 4: 107.
Behavioral objectives; 1: 15.
Benefits of computers, instructional; 1: 8.
Beta distribution; 1: 24.
Branching strategy; 1: 23.

c

CAI; 1: 31; 2: 73.
CMI; 3: 70, 88.
Cardiology; 2: 65.
Classification (instructional grouping); 4: 93.
Classification accuracy; 4: 92.
Computer-assisted instruction (CAI); 1: 31; 2: 73.
Computer-based curricular innovation, development of; 1: 28.
Computer-based learning; 1: 31.
Computer-based testing; 1: 25; 4: 92.
Computer Managed Instruction (CMI); 3: 70, 88.
Computer simulated experiments; 1: 1, 8; 2: 46.
Computerized patient management examination; 2: 66.
Computerized tests; 1: 25; 4: 92.
Computing facilities; 2: 60.
Computing services; 2: 60.
Conditional difficulty; 1: 8.
Conformation (as instructional strategy); 2: 41.
Continuum of instructional computer used; 1: 8.
Control test; 2: 50.
Conversational programming; 1: 35.
CPS analysis programs, introductory statistics; 1: 35.
Criterion referenced test; 2: 50.

d

Deep structure; 4: 109.
Delphi Technique; 1: 28.
Dichotomous outcome tests; 2: 50.
Discriminant analysis; 4: 93.
Dissemination of CAI, obstacles; 1: 28.

e

Ear-training; 4: 100.
Economic justification of CBI; 1: 10.
Effective procedures of computer programs; 4: 118.
Elementary perceives and memorizer; 4: 125.
Evaluation of course modules; 3: 76.
Expected loss (in testing); 1: 25.

f

Florida State University; 3: 84.
Forgetting theory; 4: 120.

h

Heart disease, instruction on; 4: 121.
Human belief system; 4: 124.

i

IBM 1500; 2: 42, 66.
IBM 370; 2: 66.
Improvement of instruction; 4: 105.
Incremental model; 4: 119.
Individualized instruction; 3: 70, 73.
Inference; 4: 111.
Information retrieval; 4: 107.
Instructional classification; 4: 98.
Instructional development; 3: 88.
team; 3: 84.
Instructional mode vs. operating mode; 3: 74.
Instructional strategies; 2: 41.
Instructional tests; 1: 22.
Introductory statistics; 1: 32.
CAI course; 1: 33.
CAI modules; 1: 35.
Item difficulty, test; 1: 23.
Item economy, test; 4: 94.

j

Judging student responses (algebraic); 3: 80.
Justifying instructional use of computers; 1: 10.

l

Laboratory experiment, physics; 1: 1.
Language arts courseware, elementary; 4: 130.
Learning decisions made by students; 1: 15.
Logic, instruction of; 4: 123.

m

Management of instructional development projects; 3: 88.

NOTE: Issue numbers are in bold face.

SUBJECT INDEX

a

Administration of computing services; 2: 59.
Adoption of CAI, obstacles to; 1: 31.
Adult skills courseware; 4: 131.
Algebraic expression analysis; 3: 80.
Analyzing algebraic responses; 3: 80.
Aptitude-treatment interaction; 4: 122.
Arithmetic instruction; 4: 122.
Artificial intelligence; 4: 123.
Attitudes; 1: 15.
Automation models; 4: 122.

b

Basic knowledge; 4: 107.
Behavioral objectives; 1: 15.
Benefits of computers, instructional; 1: 8.
Beta distribution; 1: 24.
Branching strategy; 1: 23.

c

CAI; 1: 31; 2: 73.
CMI; 3: 70, 88.
Cardiology; 2: 65.
Classification (instructional grouping); 4: 93.
Classification accuracy; 4: 92.
Computer-assisted instruction (CAI); 1: 31; 2: 73.
Computer-based curricular innovation, development of; 1: 28.
Computer-based learning; 1: 31.
Computer-based testing; 1: 25; 4: 92.
Computer Managed Instruction (CMI); 3: 70, 88.
Computer simulated experiments; 1: 1, 8; 2: 46.
Computerized patient management examination; 2: 66.
Computerized tests; 1: 25; 4: 92.
Computing facilities; 2: 60.
Computing services; 2: 60.
Conditional difficulty; 1: 8.
Conformation (as instructional strategy); 2: 41.
Continuum of instructional computer used; 1: 8.
Control test; 2: 50.
Conversational programming; 1: 35.
CPS analysis programs, introductory statistics; 1: 35.
Criterion referenced test; 2: 50.

d

Deep structure; 4: 109.
Delphi Technique; 1: 28.
Dichotomous outcome tests; 2: 50.
Discriminant analysis; 4: 93.
Dissemination of CAI, obstacles; 1: 28.

e

Ear-training; 4: 100.
Economic justification of CBI; 1: 10.
Effective procedures of computer programs; 4: 118.
Elementary perceives and memorizer; 4: 125.
Evaluation of course modules; 3: 76.
Expected loss (in testing); 1: 25.

f

Florida State University; 3: 84.
Forgetting theory; 4: 120.

h

Heart disease, instruction on; 4: 121.
Human belief system; 4: 124.

i

IBM 1500; 2: 42, 66.
IBM 370; 2: 66.
Improvement of instruction; 4: 105.
Incremental model; 4: 119.
Individualized instruction; 3: 70, 73.
Inference; 4: 111.
Information retrieval; 4: 107.
Instructional classification; 4: 98.
Instructional development; 3: 88.
team; 3: 84.
Instructional mode vs. operating mode; 3: 74.
Instructional strategies; 2: 41.
Instructional tests; 1: 22.
Introductory statistics; 1: 32.
CAI course; 1: 33.
CAI modules; 1: 35.
Item difficulty, test; 1: 23.
Item economy, test; 4: 94.

j

Judging student responses (algebraic); 3: 80.
Justifying instructional use of computers; 1: 10.

l

Laboratory experiment, physics; 1: 1.
Language arts courseware, elementary; 4: 130.
Learning decisions made by students; 1: 15.
Logic, instruction of; 4: 123.

m

Management of instructional development projects; 3: 88.

NOTE: Issue numbers are in bold face.

Mastery learning; 2: 50.
Mathematical models; 4: 118
Mathematics courseware, elementary; 4: 130.
Media, selection of; 3: 89.
Medical instruction (cardiology); 2: 64.
Minicomputers; 2: 46; 3: 73.
Models; 4: 118.
 of memory; 4: 118.
 of the learner; 4: 118.
Modules, evaluation of course; 3: 76.
Multivariate analysis of variance; 2: 44.
Music; 4: 100.

n

Natural language; 4: 107.
 understanding systems; 4: 111.

o

One Element Model; 4: 119.
Operational, implementation; 3: 71.
Operating systems; 3: 73.
Optimization of instruction; 4: 119.

p

Personality; 1: 16.
Physics; 1: 2.
Pilot-extended BASIC; 2: 46.
Pitfalls of CMI development; 3: 89.
PLATO; 3: 84.
 training program; 3: 89.
Prediction of responses; 1: 25.
Prenominal adjective ordering; 4: 112.
Preservice teaching training; 1: 15.
Programming tricks; 3: 82.
Prompting; 2: 41.

q

Qualitative analysis, 2: 46.

r

Random-trial increments model; 4: 120.
Reading courseware, elementary; 4: 131.
Regression Models; 4: 121.
Retention; 2: 41.

s

Sequential scoring; 4: 97.
Sequential testing; 4: 93.
Sequentially administered tests; 4: 92.
Simulation; 1: 8.
 chemistry experiments; 2: 46.
 physics experiments; 1: 1.
Situations requiring computer support; 1: 7.
SNOBOL; 4: 113.
Software systems; 3: 73.
Spelling instruction; 4: 120.
SPITBOL; 4: 112.
Statistical decision; 2: 51.
Statistical exercises, generation of (with answers); 1: 35.
Stochastic sequential machines; 4: 122.
Student control of learning activities; 1: 15.
Student Opinion Survey; 2: 42.

t

Tailored testing; 1: 22.
Team approach to instructional design; 3: 89.
Testing; 4: 92.
Texas
 public schools using CAI; 4: 127.
 schools for the deaf using CAI; 4: 127.
Theorem-prover; 4: 114.

u

University computing; 2: 59.
User access, management of; 2: 62.

v

Vocabulary instruction; 4: 120.

w

World Knowledge; 4: 111.
